

ANUJAY Pressure Feed Tanks

Salient features of Pressure Feed Tank

- Lightweight equipment for ease of handling.
- Slopping bottom to maximize the use of paint.
- Paint suction pipe of SS duly polished for ease of cleaning.
- Paint outlet valve of SS with suitable SS paint strainer.[OPTIONAL]
- Easy clamping to give uniform clamping pressure.
- Caters to 4.5 liters of mixed Paint.

General Features

- Increases productivity & coverage rate due to elimination of frequent filling of paint.
- Reduced load on the painter.
- Ease of maneuvering, particularly while painting underneath areas, ceilings etc.
- Reduces color variation due to bulk mixing of paint for the batch & facility of paint stirring manual/ auto.
- Increases the paint finish for continuous supply of the paint mixed together.
- Reduces paint spillage inherent while paint filling.
- We also make 12/22/45 ltr Pressure Feed Tank in standard as well as in SS material.
